

Central Billing Program

Experience the power of precision billing

A smarter way to manage parts and service billing

The **Central Billing (CB) Program** is a transformative solution designed to simplify and optimize billing for fleet customers and OEM dealers. By consolidating service repairs and parts purchases into a single, streamlined invoice, CB reduces complexity and enhances financial clarity.

Comprehensive billing solution

Consolidates multiple transactions into one OCR-compatible PDF invoice, saving time and improving accuracy.

Optimized for efficiency

Automated processing through Accounts Payable systems reduces administrative burden and costs.

Tailored billing cycles

Flexible schedules align with your company's financial workflows for seamless integration.

Invoice accuracy and transparency

Each invoice is matched to pre-approved claims, eliminating discrepancies and ensuring trust.

Clear, readable documentation

Easy-to-read summaries and detailed transaction backups replace cumbersome dealer repair orders.

Unlock the full potential of your fleet operations

CB empowers fleet managers to operate with greater clarity and control. From faster approvals to reduced downtime, it ensures every aspect of fleet maintenance runs smoothly saving time, cutting costs, and boosting overall productivity.

Nationwide dealer access

Tap into the entire OEM Dealer Network for consistent service quality wherever your fleet operates.

Standardized, transparent pricing

Benefit from unified parts and labor rates agreed with the National Sales Company (NSC).

Simplified contracting

Replace multiple dealer agreements with a single NSC contract, reducing legal complexity.

Centralized support

A dedicated helpdesk ensures fast resolution and consistent communication.

Operational efficiency through automation

Claim and billing automation reduces workload, allowing your team to focus on core operations.

Simplify billing and strengthen operational control

The CB program transforms complex, fragmented billing into a unified, pan-European solution. By aligning with market expectations and streamlining financial processes, CB helps fleet operators improve cash flow, reduce administrative burden, and gain greater visibility across their operations. It's a smarter, more scalable way to manage service transactions—designed to meet the needs of modern fleets.

- **Centralized, standardized billing:** One contract, one invoice, saving time and reducing complexity across markets.
- **Improved cash flow:** Faster approvals and payments aligned with warranty cycles enhance financial stability.
- **Reduced financial risk:** Consolidated invoicing improves payment reliability and minimizes exposure to unpaid claims.
- **Fleet portal access:** Real-time insights and digital tools reduce admin and support better decision-making.
- **Market-aligned solution:** Meets growing demand for unified billing from fleet customers across Europe.
- **Enhanced control and visibility:** Gain oversight of fleet structures and service operations across regions.
- **Stronger OEM positioning:** Boosts loyalty, increases service touchpoints, and drives parts sales.

One invoice. One network. Fleet billing reimaged.
Experience the power of precision billing.

With MSX Central Billing, streamline service invoicing, reduce financial risk, and gain full visibility across your fleet network, no matter where your vehicles operate.
